ACKNOWLEDGEMENT

Receipt is acknowledged of the Amendment filed July 15, 2011.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Christine Mackiewicz on August 26, 2011.

The application has been amended as follows:

Claim 18, line 5, replaced the phrase "a nominal steering angle" with --the nominal steering angle--.

Claim 18, line 9, replaced the phrase "the determined steering line" with --the determined steering torque of the steering line--.

Claim 18, line 11, replaced the phrase "moment." with --moment;--.

Claim 18, appended the claim with --wherein the additional steering torque is composed of at least two additive components, with a first component being determined dependent on the difference between the nominal steering angle and the instantaneous steering angle, and a second component is established dependent on the estimated value of the load moment.--.

Claim 19 has been cancelled.

Claim 26, line 4, replaced the phrase "a nominal steering angle" with --the nominal steering angle--.

Claim 27, line 3, replaced the phrase "steering request" with --a steering request--.

Claim 30, line 2, replaced the phrase "devices" with --device--.

Claim 31, line 2, replaced the phrase "devices" with --device--.

REASONS FOR ALLOWANCE

Claims 18-34 are allowed.

The following is an examiner's statement of reasons for allowance: the closest prior art of record, Barton et al. (WO 02/074638 A1), taken alone or in combination of other references, does not teach or fairly suggest a method, or a device configured to implement the method, for assisting an operator of a vehicle in adjusting a nominal steering angle on at least one steerable wheel of the vehicle for vehicle stabilization comprising, in part: determining a steering torque of a steering line of the vehicle dependent on a difference between a nominal steering and an instantaneous steering angle; estimating a value of a load moment acting on the steering line of the vehicle based upon a hand moment, a motor moment, a steering column steering angle and a steering angle velocity of a steering column; and applying an additional torque to the determined steering torque of the steering line, dependent on the estimated value for the load moment; wherein the additional steering torque is composed of at least two additive components: a first component dependent on a difference between the nominal

steering angle and the instantaneous steering angle and a second component dependent upon the estimated value of the load moment.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

PRIOR ART

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Please see the attached form PTO-892.
